OHSAS 18001 Certification in UK: Strengthen Workplace Health and Safety

Ensuring a safe and healthy workplace is essential for every organization. **OHSAS 18001 Certification in UK** was a globally recognized standard for Occupational Health and Safety Management Systems (OHSMS). Although it has been replaced by ISO 45001, many businesses still refer to OHSAS 18001 when seeking information about occupational health and safety certification. Implementing an effective health and safety management system helps organizations reduce workplace risks, improve employee well-being, and demonstrate their commitment to safety.

What is OHSAS 18001 Certification?

OHSAS 18001 was an international standard designed to help organizations identify, control, and reduce occupational health and safety risks. It provided a systematic framework for preventing workplace accidents, complying with legal requirements, and promoting a culture of continuous improvement in health and safety management.

Today, organizations certified to OHSAS 18001 are encouraged to transition to ISO 45001, the current international standard for occupational health and safety management.
